Robert Gardiner, M.P. New Head of U. F. A.

Robert Gardiner, M.P. for Acadia is the new president of the United Farmers, having been elected to the office by acclamation at the twenty-third annual convention on Wednesday to succeed H. W. Wood, veteran president of the U. F. A. for the past fifteen years.

Scholefield Retires

H. E. G. H. Scholefield, who has completed nine years as vice-president, withdrew his nomination for the vice-presidency, leaving Messrs. Critchlow, Bevington, Priestly and Arselon in the field.

J. Reeves Installed as N. G. of Crossfield L.O.F. Lodge

On Thursday last the officers elect, for the present term, of the local Oddfellows Lodge, attended a joint installation, with the officers of the Didsbury Oddfellows in that town.

The installing officers headed by D. D. G. M. Bro. Webb, of Crescent Lodge, Calgary, officiated.

Bro. Reeves was installed as N. G. and Bro. Thomas as V. G. After which Didsbury brothers entertained the visitors.

Crossfield Lodge No. 42, L.O.F., was very well attended last night (Wednesday). Assistant Grand Secretary Bro. Parker of the Grand Lodge of Alberta, was present and addressed the brothers on Oddfellows'hip. D.D.G.M. Bro. Webb was also present.

Many Hear Dr. Oliver

A demonstration of what a Spar-ton junior radio will do took place in the United Church on Wednesday evening, when quite a few interested listeners gathered to hear the address given by The Rev. Dr. Oliver, Moderator of the United Church of Canada, which was broadcasted from the Knox United Church. Dr. Oliver's voice came in with great clearness and his address was thoroughly enjoyed by all present.

Enjoyable Surprise Party

A surprise party numbering 20 persons gathered on Saturday evening last and made as their destination for the evening the home of Mr. and Mrs. R. M. McCool. The party was opened with five tables of court whist, after which various games were played. These being disposed of, the ladies served a dainty lunch, during which prizes were handed out to the winners of the whist games, who were as follows: Ladies' first, Mrs. Lorne Wilson; booty prize Mrs. R. Nichol; gent's first, Mr. R. Nichol; gent's booty, Mr. A. Sackett.

Coming Events

Grand dance in the U. F. A. Hall on Friday, Jan. 23, under the auspices of the C.W. L. Music by the Moonlight Serenaders of Calgary.

Dance in the U. F. A. Hall on Friday, Jan. 30th. Music by the famous Rhythm Kings of Calgary. This orchestra played here on New Year's eve, and they are good.

Annual Burns' Night Entertainment and Dance in the Masonic Hall on Monday, Jan. 26th.

Annual Round-Up, Entertainment and Dance of The Old Timers' Association will be held in the U. F. A. Hall on Wednesday, Feb. 11th. Bigger and better than ever.

The curlers got away to a good start last Thursday and several games on the schedule have been played, but the chinook on Tuesday put a damper on the roarin' game. With colder weather on Wednesday night it is expected to get away again tonight (Thursday.)

Old Timers' Make Ready For Annual Round-Up

At a meeting of the executive of Old Timers' Association held in Laut's store on Saturday evening, final plans were made for the holding of the annual round-up, which is to be celebrated with a banquet, entertainment and dance in the U. F. A. hall on Wednesday, Feb. 11. Lantern slides of the early days in Calgary will be shown, along with an excellent program which includes vocal and instrumental selections, and a speaker who will recall many of the old times in this district. For the dance, old time dances will again be featured. A most appetizing menu has been made out for the banquet; and in all it is planned to make the event this year just a little bigger and better than ever.

Old Timers are asked to secure their membership tickets as soon as possible from the secretary Ivor Lewis.

Remember the date, February 11th. Bringing back the old days again just for a night. Don't miss it. Whoopee.

BOARD OF TRADE WANT SCHOOL FAIR

At a meeting of the executive of the Board of Trade it was decided to organize a School Fair for Crossfield and District. The following committee was appointed to get full particulars and see what can be done in this connection: R. M. McCool, T. Mair, J. P. Metherall and W. Miller.

A meeting will be held in the office of the Secretary T. Tredaway on Saturday, Jan. 24 at 8 o'clock, when a representative of the Provincial Department of Agriculture will be present to explain in detail the requirements in connection with the forming of a School Fair.

It is hoped to have a large attendance of school trustees and teachers from the various schools in the district present at this meeting.

Rumpus at School Meeting Aired in Court

James Miller of Scotia School District appeared before Ivor Lewis, police magistrate at Crossfield on January 18th, charged by A. Arnold one of the trustees and secretary of the Scotia School, with committing a common assault on Arnold by striking him in the face with his hand. Miller pleaded guilty and was fined \$2.00 and costs.

Charged by E. Fleck, chairman of the School Board of Scotia School of disturbing a school meeting on Jan. 12 at Scotia School annual meeting. Miller pleaded not guilty. His Worship, after hearing considerable evidence, found him guilty and assessed him another \$2.00 and costs, making a grand total of \$4.00.

The evidence disclosed the fact that personalities were entered into at the school meeting and his Worship remarked, "you must not take the law in your own hands," he considered Miller had been greatly aggravated.

School Meeting Friday, Jan. 23rd.

Don't forget the special meeting of the ratepayers of the Crossfield District on Friday at 2 p.m. in the fire hall for the purpose of electing a successor to Mr. Miller, who recently resigned, as a member of the School Board.

Skating Rink Nearly Ready

Mr. A. Hoywood is making good progress in flooding the skating rink and if the present weather continues the rink should be ready by the first of the week.

Notice

Owing to depression in the lumber business it is impossible for this district to support two yards, and as the future of the business is so uncertain, especially as we understand a lumber yard is to be located at Madden and one at Cremona. For these reasons, and on the authority of our shareholders, we have sold our lumber stock and plant to the Atlas Lumber Co. Ltd.

All other branches of our business will be carried on as usual.

We take this opportunity of thanking the public for their support in the past and hope to be favored with a continuance of this support in the future.

BRITISH FILM GUILD IS FORMED IN CANADA

Toronto, Ont.—Announcement was made recently of the organization of the British Film Guild in Canada, an independent organization of Canadian theatregoers, interested in seeing British and Canadian pictures in Canadian theatres. The Guild has an initial membership of 150 people and is now conducting a mail poll for the election of officers.

Believing the vagueness surrounding specific activities of British studios, the personalities of stars and directors, what British films are currently available for Canadian showings and how they appear to Canadian tastes, to be one of the major handicaps to British film progress in Canada, the Guild hopes to act as a clearing house for information, the announcement said.

Its appointees will preview incoming British films and send frank comments to the membership at large.

Members as a whole will report on British films they see and a summarized symposium of Canadian opinion will be sent to the British producer for his information as an indication of Canadian film entertainment statistics on British films, will be compiled with a notation of where they were shown, audience reactions and degree of box office success in each case. Co-operation of British producers in such things as arranging previews has, it stated, been obtained.

Decision On Freight Rates Re-Affirmed

Railway Board Explains Method Of Computing Reduction In Maritime

Ottawa, Ont.—A re-affirmation of the former decision as to the correct method of computing how the 20 per cent. cut in maritime freight rates should be arrived at is contained in a judgment of the board of railway commissioners, delivered here.

The judgment decrees that on west-bound freight traffic the point of whose origin lies within the "select region," the reduction shall be calculated on the ratio which the distance between that point of origin and the western limit of the "select area," Diamond Junction, bears to the whole distance from the point of origin to the ultimate destination. That is to say, a commodity transported, for example, from Moncton, N.B., to Calgary, Alberta, enjoys the 20 per cent. freight reduction not on the entire Moncton-Calgary rate but on that proportion of the Moncton-Calgary rate which that commodity bears on the line between Moncton and Diamond Junction, or Levis, Que.

Talks To Buenos Aires

Prince Of Wales Telephones Across 6,500 Miles From London To Argentina

London, England.—The Prince of Wales picked up his telephone at York House and sent his voice across 6,500 miles to Buenos Aires, talking for seven minutes with Sir Herbert Gibson, chairman of the British trade exhibition, which the Prince will open in the Argentine capital March 14.

So clear was the transmission that friends sitting near the Prince could hear what Sir Herbert said. First he read a message of welcome to the heir and then there was an informal chat.

To Improve Potato Crop

Winnipeg, Man.—Potato growers of Manitoba were urged to use certified seed and to strive to produce No. 1 grade crops, by John Tucker, chief potato inspector of the Dominion, who addressed the board of trade's agricultural bureau recently. Manitoba's production in the last 10 years, he said, averaged 135 bushels per acre, which he considered low.

Will Celebrate Diamond Jubilee

Victoria, B.C.—British Columbia will celebrate her diamond jubilee with all the pomp and circumstance befitting the occasion, at the capital of the province on July 30 this year. It was on July 20, 60 years ago, that the Crown Colony of British Columbia was formally included in Confederation.

U.S. Motor Vehicle Deaths

Chicago.—There was 32,500 motor vehicle deaths in the United States in 1930, the National Safety Council estimated recently. This figure represented an increase of approximately 1,300 deaths over the 1929 period.

Courage Needed Says Federal Woman Member

Miss MacPhail Thinks Representatives in House Should Follow Their Conscience

Brantford, Ont.—"You can take your conscience into the House of Commons, but to keep it there—oh, boy!" commented Agnes MacPhail, M.P., in an address here, after reviewing the attitude of the members toward a woman colleague.

Miss MacPhail declared that there was great need today in parliament for members to follow their own consciences, and courage to stand for what was right, irrespective of party or the big interests. The House, she said, "lady needed it. Hon. Arthur Meighen and Hon. Charles Dunning, two men of courage."

She declared that prosperity could not be secured by injecting life into one or another industry as with a hypodermic needle, but was dependent on the prosperity of all.

British Shipyards Busy

Built Over Third Of World Construction During Last Quarter-Year

London, England.—Well over one-third of the total shipping under construction in the world in the quarter-year ending December 31, was in British shipyards, according to Lloyd's quarterly report. The exact percentage was 39.1 out of a total of 2,326,088 tons. The only figures not taken into account are the comparatively small tonnages building in Russia, which does not supply statistics.

The number of ships being built in Great Britain in the period was 181 with a total tonnage of 908,802. This was a decrease of 207,844 tons from the previous quarter, and 651,352 tons less than in the same period of 1929.

Of the foreign tonnage under construction, 232,080 was recorded in the United States, 261,215 in Germany, 179,877 in Italy, 174,215 in France, and 160,078 in Holland.

Opening Of Manitoba's Legislature Announced

January 27 Date Decided On At Cabinet Meeting

Winnipeg, Man.—Manitoba's legislature will open Tuesday, January 27, Premier John Bracken has announced. Decision to commence the session on that date was reached at a cabinet meeting.

Unemployment relief measures loom as an important subject for the session. Re-adjustment of provincial taxation to enable the government to reduce the municipal levy by one-half is another important piece of business to be discussed by the members of the legislature.

Expect Improvement In Fishing Industry

Comprehensive Survey Being Carried Out By Fisheries Department

Halifax, N.S.—A marked improvement and more stable conditions in the Canadian fishing industry are expected in the reasonably near future by Hon. E. N. Rhodes, minister of fisheries.

Speaking of the survey of the industry being carried out by the department, Hon. Rhodes said that it could not be completed before next August. A study of market conditions at different seasons of the year was one of the factors involved.

Question Of Gold Payment

Paris, France.—The answer of the French Government to the last British note relating to the payment in gold of the French war loan, which will be remitted soon, will constitute a courteous refusal to submit the differences to the exceptional procedure of arbitration, when normally competent jurisdiction has not been invoked; it was reported recently.

Racer Sails For States

Southampton, England.—Capt. Malcolm Campbell, British automobile racer, sailed on the "Homeric" for New York with his racing car, the Bluebird. Arrangements for his speed trials at Daytona Beach, Fla., at present somewhat confused, are not settled, he said, he is ready to go on to New Zealand.

In Canadian Firm

Toronto, Ont.—Durrant Motors of Canada, Limited, is now owned, controlled and operated by Canadians, it was announced by Roy D. Kerby, president and general manager of the company. The announcement said the company is now probably the only automobile company in Canada so controlled and managed.

Advocates Fruit Growing

Manitoba Farmer Says More Money In Fruit Than In Grain

Winnipeg, Man.—A pioneer fruit grower of the prairies told delegates to the annual convention of the Manitoba Horticultural Association recently, that fruit growing should be regarded as a profitable field by farmers.

His four acres of crab apples, plum and hybrid cherry trees netted him a greater profit last year, William Shepherd, Rathwell, Man., said, than 300 acres of grain would have. Mr. Shepherd considered fruit farming had a bright future in Manitoba.

HUGE TELEGRAPH MERGER MAY BE ARRANGED

Montreal.—Amalgamation in a \$50,000,000 corporation of the respective commercial telegraph systems of the Canadian Pacific Railway and the Canadian National Railway is being considered by the two parties. The Canadian Press understands the proposal has also been put before the Dominion Government at Ottawa.

This is the much larger idea behind the statement in Ottawa of Sir Basil Blackett, chairman of Imperial and International Communications, Limited, "that the Canadian Pacific and the Canadian National shall become partners with the I.C. in forming a Canadian overseas communication company, which shall include the Canadian Marconi Company."

The suggested amalgamation presents obvious advantages and no less obvious disadvantages. Economically, there would be the saving in the present duplication from coast to coast in equipment and personnel, but even more important would be the advantages of a strong, all-Canadian corporation, able to meet competition and hold its own against all comers.

For neither of the two Canadian commercial telegraph companies is really independent, because each is necessarily allied and more or less dependent upon one or other of the rival United States communication groups, the Western Union and the Postal, which again results in the bulk of overseas going through foreign rather than British channels.

This strong corporate would operate at a much lower cost and therefore at lower rates to the permanent advantage of the Canadian public. At the present time, eight commercial telegraph zones are strung across the Canadian continent, and a message, to pass from one to another and beyond, means an increasingly higher rate, constituting a heavy toll on the economic life of the country. It is probable that such an amalgamation would permit of the cutting down of these eight zones to only three: Eastern zone, from Cape Breton to the Head of the Lakes; Central zone, Head of the Lakes to Regina; Western zone, Regina to Victoria. In other words, commercial telegraph traffic would have to bump over only two cost summits as from coast to coast, instead of over seven, while the great area of Eastern Canada would enjoy a flat rate.

The latest recruit to the local pit is Arthur Cutten, Canadian-born and long called king of the traders, who Tuesday, January 15, bought a seat on the Winnipeg Grain Exchange.

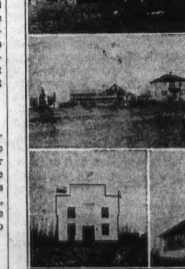

While his interests tread here before, this is the first time Mr. Cutten has been a qualified member of the Exchange.

Cutten is understood to have paid \$12,600 for his membership.

Ferguson High Commissioner

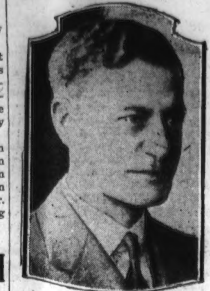

Ottawa, Ont.—Canada's new High Commissioner in Great Britain—Hon. G. Howard Ferguson—became a member of the Canadian Privy Council, January 14. Accompanied by Premier R. B. Bennett, the High Commissioner proceeded to Government House and in the presence of His Excellency took the oath as a privy councillor.

Winning Manitoba Communities in C.N.R. Progress Contests

Completion of the first year's contests in the Canadian National Railways community progress competitions for European settlements in Manitoba placed Rossburn, Ukrainian, first; Steinbach, Mennonite, second; Rhineland, Mennonite, third; Ethelbert, Ukrainian, fourth, and Stuartburn, Ukrainian, fifth. Above pictures show: (1) Residence of Jacob Schollenberg, Rhineland; (2) Blumensort school, Steinbach; (3) A. R. Penner's farm home, Steinbach; (4) Main street of Ethelbert; (5) Community Hall, Rossburn; (6) Byrd school, Rossburn, and (7) King George school, Rossburn.

PHYSICAL EDUCATION EXPERT

Captain Robert Jarman, now of Manitoba, physical education expert, who has just finished a series of demonstrations of his teaching methods in Toronto. He may be brought to Toronto when his Manitoba contract expires.

Gift From Lord Willingdon

Governor-General Presents Car To Children's Aid Society, Ottawa

Ottawa, Ont.—Ottawa's needy children are to have a handsome automobile of their own—the gift of the departing Governor-General and Viscountess Willingdon.

The generous presentation was made by Their Excellencies to Mrs. C. H. Thoburn, prominently identified with several organizations having to do with child welfare. In tendering the auto, of an expensive make and brought to the Dominion when Lord and Lady Willingdon first took up residence here, Their Excellencies voiced a desire that it be devoted to the use of the children for their various outings.

The car will be used by Ottawa's young folk, under direction of the Children's Aid Society.

Buyers Seat On Grain Exchange

Arthur Cutten, Chicago Operator, Pays Good Price For Entry To Winnipeg Pit

Winnipeg, Man.—With wheat de-throned as king in the Chicago grain pit, big operators there are transferring their activities to the Winnipeg Grain Exchange.

The latest recruit to the local pit is Arthur Cutten, Canadian-born and long called king of the traders, who Tuesday, January 15, bought a seat on the Winnipeg Grain Exchange.

While his interests tread here before, this is the first time Mr. Cutten has been a qualified member of the Exchange.

Cutten is understood to have paid \$12,600 for his membership.

Ferguson High Commissioner

Ottawa, Ont.—Canada's new High Commissioner in Great Britain—Hon. G. Howard Ferguson—became a member of the Canadian Privy Council, January 14. Accompanied by Premier R. B. Bennett, the High Commissioner proceeded to Government House and in the presence of His Excellency took the oath as a privy councillor.

Wheat Exports Increased

Canada Exports More Wheat During Past Nine Months Than During Same Period Previous Year

Ottawa, Ont.—The three-quarter mark in the present fiscal year Canada has exported considerably more wheat than during the corresponding period last year, but the amount realized from the business was appreciably lower, figures issued through the department of national revenue show that the Dominion exported 184,442,015 bushels of wheat during the nine months just closed, for which the sum of \$157,755,170 was realized. In the corresponding nine months of 1929-30 the total quantity exported was 153,887,017 bushels, valued at \$187,722,619.

Both exports of domestic commodities and imports into Canada suffered a big decline in the nine months just ended. Total imports during the nine months just ended were \$729,891,813, as compared with \$898,833,19 in the corresponding period of 1929-30. Total exports of Canadian produce during the past nine months were to the value of \$656,113,905 as against domestic exports during the nine-month period of last year, which totalled \$890,465,841.

Mounties Will Visit Argentine

Four Picked Members Of Force To Be In Charge Of Canadian Exhibit

Winnipeg, Man.—Four picked members of the Royal Canadian Mounted Police will sail for Buenos Aires on the Canadian National steamship "Prince Robert" from Halifax on February 21, according to advice received here. They will be in charge of the Canadian exhibit at the British Empire Trade Fair and will in themselves be a splendid advertisement for the Dominion.

The large Canadian delegation will also represent the Dominion at the "Prince Robert." The men selected are not from Saskatchewan.

BID WILLINGDONS FAREWELL ON LEAVING CANADA

Ottawa, Ont.—Ottawa said "goodbye and good luck" to Their Excellencies Viscount and Viscountess Willingdon. In the brightness of a sparkling sharp Canada winter day, prominent representatives of the political, diplomatic, business and social world of the Dominion gathered to bid farewell to the Governor-General and his wife, who, for more than four years, have lived among the Canadian people. Bright uniforms of the soldiers, who constituted travelling escort and guard of honor for Their Excellencies' flags and bunting, and a large wreath of beautiful roses with its message of "Good Luck" added colour to the scene.

Headed by Rt. Hon. R. B. Bennett, prime minister, members of the Dominion cabinet were present to shake the hands of Viscount and Viscountess Willingdon for the last time. Rt. Hon. W. L. Mackenzie King, Liberal leader, Hon. G. Howard Ferguson, newly-appointed high commissioner for Canada in Great Britain; Hon. Vincent Massey, former Canadian minister to Washington, representatives of foreign governments in Ottawa, and others prominent in various walks of life in the Dominion were among the crowd which gathered at the station.

After the last farewells were said, as the train moved slowly away from the carpeted stairway up which Their Excellencies had walked to the rear platform of their private train, the band of the governor-general's foot guards struck up the National Anthem, and in a minute changed to the familiar strains of "Auld Lang Syne." The crowd broke into cheers. Their Excellencies waved farewell, and the train pulled away.

Viscount and Lady Willingdon will spend a couple of months in England before leaving to take up their new duties in India.

From Government House, which Their Excellencies left shortly before noon to drive in the state car of the Central Station, a travelling escort of the Princess Louise Dragoon Guards accompanied them. Boy Scouts lined the drive through which the vice-regal party drove in the Government House grounds. His Excellency was Chief Scout for Canada.

Accompanying Their Excellencies were E. C. Merville, private secretary, and Mrs. Merville, Col. Humphrey Snow, comptroller of the household, and members of the staff. Mr. and Mrs. Merville will go to India with Lord and Lady Willingdon.

EARTHQUAKE CAUSES HAVOC IN MEXICAN CITY

Mexico City.—Soldiers were turning over the wreckage of the thriving city of Oaxaca, carrying out the bodies of men and women who perished in the earthquake which rocked Southern Mexico.

At least 12 persons perished and many more were injured. Telegraphic communication was impossible and radio messages irregular. The city itself, fragmentary messages said, was in ruins and panic-stricken people slept in the open, despite intense cold, because they were afraid to go back to such homes as were left standing.

The only clear picture of the disaster came out of the ruined city in a message to President Ortiz Rubio from General Everardo Perez, military commander of the state of Oaxaca.

It was he who said that at least 25 persons had been killed or injured. Another message to the department of communications said that 12 had been killed but this could not be verified immediately.

"It is impossible to describe the confusion here," the general's message said. "The loss is incalculable. At least 25 persons have been killed or injured and we are still discovering bodies of the dead."

The general's home was destroyed and he was living in his automobile, he said. The military barracks were in ruins and a column of cavalry was one of those killed. The police were helping the soldiers to search the ruins for additional victims.

Epicenter of the quake, which struck Oaxaca, was placed a few miles northeast of the city. Mexico City itself was shaken for four minutes, and one person was killed and 25 injured. There also, was considerable property damage.

Revenues Decrease

Ordinary Revenues For Canada Decreased By \$66,000,000 In Nine Months Period

Ottawa, Ont.—Ordinary revenues of Canada, decreased by \$66,000,000 approximately for the nine months ended December 31 last, as compared with the corresponding period in 1929. During the past nine months' period, according to the latest annual financial statement issued recently, ordinary revenues totalled \$285,221,051, as against \$351,287,325.

Ordinary expenditures increased by \$15,900,000 over the corresponding period. For the nine months ended December 31 last, ordinary expenditures amounted to \$280,722,205 as contrasted with \$265,141,767 for the period of 1929.

The statement represents only the receipts and payments which have passed through the books of the department of finance up to the last day of the month.

The net debt of Canada, according to the statement, shows an increase. On December 31 last, the net debt was \$2,193,748,531, as compared with \$2,159,214,730 on December 31, 1929.

New Commander Appointed

Lieut. Hart Will Take Canadian S.S. Vancouver On Winter Cruise

Ottawa, Ont.—Lieut.-Commander Frederick G. Hart, R.C.N., has been appointed to the command of H.M.C.S. Vancouver. His appointment took effect on January 20 and he will take the "Vancouver" on its winter cruise to United States and other foreign ports, leaving Esquimaut, B.C., on January 26.

Lieut.-Commander Hart joined the Royal Canadian Navy during the war as a cadet at Halifax and was promoted to lieutenant commander in 1928. He qualified for command of destroyers while serving in the Royal Navy in 1929.

To End Slavery In Liberia

Washington, D.C.—The United States would be willing to associate itself with the League of Nations in setting up an international commission to end slavery in Liberia, the United States learned recently from a high official.

Feels Germany Breaks Promise

Paris, France.—A conference of ambassadors here is believed to have discussed the question of German armaments, with the impression prevailing that Germany has allegedly failed to fulfill all disarmament promises under the Versailles treaty.

Homeless Entries Increase

Edmonton, Alberta.—According to Provincial Government figures, homeless entries and soldiers' grants for the month of November amounted to 758 as against 553 for the same period last year.

Future Looks Encouraging

President Beatty of C.P.R. Reviews Economic Position of the Dominion.

Railway earnings, which have shown a drop of some 16 per cent. during the past year, can reasonably be taken as indicating the total decline in Canadian activity during the same period, states E. W. Beatty, president of the Canadian Pacific, in his annual review of the economic position of the Dominion.

Mr. Beatty believed the wheat situation has been responsible for at least half of the decline, and that with the marketing at a fair price of the wheat now in the country, there would remain only a few unimportant barriers to better conditions.

Mr. Beatty sees encouragement for the future from the way in which industries hitherto of comparative unimportance in Canada are assuming a leadership in the economic scheme of things. He recalls that 50 years ago the total mineral production in Canada was valued at not more than \$10,000,000.

Touching on depressions in former years, Mr. Beatty says that 50 years ago, at the time of the inception of the Canadian Pacific Railway, Canada was suffering from a depression which, in fact, was more complete than that which is now being experienced. At that time lumbering was the dominant activity, agriculture was just emerging from the pioneer stage in the older districts, the market for farm produce was extremely limited and prices no less so, and the other industries of the country were in an elemental stage. The natural resources of the north were quite unknown, and those of the west only guessed at. Another depression came when the western "boom" broke, and wheat fell as low as 35 cents a bushel. The country had weathered these storms successfully, Mr. Beatty said.

Trouble With Mathematics

More Pupils Failed In This Subject Than Any Other

To the rising generation as to the old, multiplication is apparently still vexation and the rule of three the school's chief perplexity. More pupils failed in mathematics in the New York high schools during 1929 than in any other subject, according to the report of the city superintendent recently issued. In one school more than half the pupils failed first-term algebra, while failures in high school mathematics as a whole totaled 26.9 per cent. On the other hand, less than 5 per cent. failed in music and domestic science and 13 per cent. in English, though foreign languages demanded a student toll second only to mathematics.

Silver Fox, Muskrat, and Mink
Ten years ago the total value of fur-bearing animals on fur farms in Canada was placed at \$4,723,105. The industry today represents a capital investment of practically four times as much as in 1920. As one might expect, the silver fox heads the list with a capital investment of \$14,922,278—an increase of \$10,400,000 over 1920. The next on the list is muskrat, with an investment of \$567,749, and the third mink with \$328,928 invested.

A Sure Preventive

A Scotsman who was a bad sailor was crossing the Channel. He went to the Captain and asked him what he should do to prevent sea-sickness. "Have you got a sickness?" asked the captain. "Aye" replied the Scot. "Well, hold it between your teeth during the trip."

He (sarcastically)—Do you call that thing on your head a hat?
She (icily)—Do you call that thing on your hat a head?

"Don't drive so quickly—are you not afraid of an accident?"
"It doesn't matter—I have another car."—Montague, Chartered.

W. N. U., 1929

Learned Lesson From Child

Boy Taught Father How To Answer His Own Prayer

A good many of the prayers we offer on behalf of the poor and destitute can be answered by ourselves without troubling the Lord.

A story was told on the radio that might well cause us to sit up and think. A certain successful farmer who prayed every day for the destitute, had a young boy of whom, naturally, he was both proud and fond. Each day the father would knock off work for an hour to play with the boy. They would be policeman, soldier, sailor, teacher, preacher, etc., in turn. One day the farmer was called away on business in Boston, and on his return trip was startled by profuse thanks proffered by several neighbors he met. One was so thankful for the apples, another for the potatoes, and so on. The farmer said nothing, but accepted the grateful expressions. Why not, did, however, stop on the gas and hurry home to ascertain what it was all about. He hustled straight to the barn and storehouse to discover that not a potato was left, and every apple had disappeared. Why not, did, however, stop on the gas and hurry home to ascertain what it was all about. He hustled straight to the barn and storehouse to discover that not a potato was left, and every apple had disappeared.

Of course he went after little Peter, demanding why he had given away all the apples and potatoes. "Well, Dad," the boy answered between sobs, "I was just playing 'I was God.' 'What do you mean, my boy?' 'See, Dad, every day you pray to God to supply the needs of the poor people, and I just played God and answered your prayers.'"

The farmer recognized the point and afterwards told the Lord less about the condition of his neighbors, and went about helping them.

They All Come To It

Advertising Best Method Known To Build Up Business

Following in the footsteps of the department of national revenue, and the federal government, the department of fisheries has decided that its work can be made truly effective by the use of newspaper advertising.

It is announced that the department of fisheries has agreed to spend \$25,000 on advertising to increase the consumption of Canadian canned salmon, by an agreement in which the canners agree to donate a flat sum, dollar for dollar with the government. In a dispatch which followed on one referred to above, the information was given that the Ontario Retail Druggists' Association has decided to establish during the year 1931, a vigorous campaign of newspaper advertising, designed to emphasize the fundamental difference between the drug store and other retail stores.

Above are cited only two instances of how newspaper advertising is to be used for education and business-building purposes combined. The salmon packers of British Columbia are being hard pressed to secure markets, and the government is going to help them secure these by the most logical method known, the use of newspaper advertising. The druggist often finds that the professional side of his business is overlooked by those who simply regard him as a retail merchant, so, through his association, he proposes to tell the world all about what he has to offer.

Some Good Excuses

Given By People To Avoid Paying Income Tax

An Oriental replying to a demand for income tax returns, wrote that "the government is going to help me on my business; I am very like pay tax." A newlywed asking for an extension of time to pay taxes, explained: "The lowest financial cycle in a man's life is six months after standing before the altar and saying 'I will.'"

A Scot wrote in asking for a deduction of \$1.04, representing two-cent stamps which he had affixed to his pay cheque each week and forgot to deduct from his income-tax return.

Mining In Manitoba

With the progress that has been made in railway construction, mine development and exploration, northern Manitoba, and more particularly that area adjacent to the Saskatchewan boundary, is taking its place among the mineral producers of the Dominion.

Not So Enthusiastic

Friend: What did the audience say when you told them you had never paid a dollar for a vote?
Politician: A few cheered, but the majority seemed to lose interest.

Fiscal savings in Japan are increasing at the rate of \$50,000,000 a month.

A Growing Service

Valuable Work Carried On By The Plant Inspection Service

When first started in 1919, roughly ten years ago, the plant inspection service of the Federal Department of Agriculture examined a total of 874,466 plants imported into Canada. Last year this service reached the huge figure of 48,044,688 plants imported into Canada from other countries, an increase of 5,000,000 plants over 1928.

These importations had an estimated value of \$1,383,103. In the course of the work 15,806 permits were issued and 9,316 inspections made. As a result of this service a total of 908 diseased plants and insect pests were detected. The pests inspected included caterpillars, scale insects, borers, bulb flies and mites. In sixty cases the plants involved were refused entry, and in 504 cases shipments were returned to consignors as not having been properly inspected for pests and diseases in the country of origin.

In addition to this service inspection of mail parcels amounted to 2,966 examinations of 3,515 containers in all. A total of 38,244 plants arrived in Canada in this way.

The inspected service also covered plants brought into Canada by passengers on boats. During the fiscal year 1929-30 a total of 3,967 boats were visited and on these 182 passengers were found to have plants with them. In twenty-five instances parasites being brought in from Europe were intercepted and confiscated.

Nursery stock exports to a total of 642 shipments to twenty-one different countries were also inspected; representing an increase of three hundred per cent. in the quantity of nursery stock sent out from Canada. This material included 245,361 bulbs, 403,661 ornamentals, 130,335 fruit trees, 15,683 conifers, 5,817 pounds of tree seed, 1,000 pounds of onion sets, 1,000 square yards of sod and 97 vegetable roots.

Fixing Quality

Government Inspectors Pay Visit To Canning Factories

One of the most valuable of the services provided for the protection of consumers in Canada as well as for advantage to growers who produce high quality products is the commercial inspection service of the Fruit Branch. During the past fiscal year plant inspectors made 3,300 visits to 414 canning plants throughout the Dominion, issuing 2,400 certificates covering products from which 694 samples were taken; these included:

Cases	47,000
Tomatoes products	47,842
Pears	22,100
Corn	11,410
Pears	64,700
Evaporated	12,430

The federal inspection service determines the quality of the product, which is required by statute to be marked on the label affixed to every can of product offered for sale in Canada.

Grades For Rhubarb

Three Recommended Grades For Hot-house Plants

The Dominion Fruit Branch has introduced three recommended grades for "forced" or hot-house rhubarb, these are: "Canada Fancy," not less than three inches in circumference; "Canada No. 1," not less than two inches; and "Canada No. 2."

The branch has also suggested three types of container as standard for the marketing of rhubarb: (a) standard box or basket containing twenty-five pounds net; (b) a box containing ten pounds net, wrapped in wax or cellophane paper; and (c) a veneer box holding twelve pounds net.

More Eggs Laid

During the last year since Egg Laying Contests have been conducted by the experimental farms branch of the Federal Department of Agriculture a steady increase in the volume of egg production is noted. In 1929 the average of 3,256 birds transported in these contests was 176.9 eggs per bird, an increase of fifty-four eggs per bird over 1928.

Father (angrily): "Did I see you kiss my daughter, young man?"
Youth: "I really cannot say. I was fully occupied at the moment."—Hummel, Hamburg.

Smallpox And Vaccination

Process Of Preparing The Vaccine Is Very Interesting

(By John Burke Ingram.)

In our last article I told you how Edward Jenner, one of mankind's greatest benefactors, discovered how to prevent smallpox. I told you how one person in ten died of this disease prior to his discovery, and how, in the eighteenth century, 60 million Europeans died from it. I told you how the Sovereigns and leaders of Europe, how Parliament and people all over the world poured honors upon the great Jenner. Today I should like to tell you just exactly what vaccination is, how the vaccine is secured, how it is administered and a few other interesting facts about mankind's great safeguard against one of the most horrible diseases that ever afflicted the human race.

In the first place, to secure a healthy calf. From the time they are the calf till the moment of its painful death, it becomes one of the most favored of animals. It leads the life of Riley or whatever the bovine equivalent to the life of Riley may be. It is bathed gently and carefully. It is excellently fed and cared for, kept clean and healthy. Then they vaccinate it with the germs of cowpox. This gives the calf a mild case of cowpox. Then what happens? Because the calf is healthy its body begins to fight the cowpox germs and it develops what are known as antibodies in order to fight these germs.

It is these antibodies that the doctors want to be developed in the blood of human beings; they produce a reaction which enables the human blood to successfully fight smallpox germs. The blood is then taken and is permitted to begin their work of causing smallpox.

The process of preparing the vaccine is very interesting. When the vaccine doctor chloroforms it, it washes off the particles of its skin upon which the vaccine viruses have appeared. (This process of washing, by the way, sometimes takes a couple of hours, so thoroughly is it done. Sterile water is used.) The doctors then examine the calf, make sure that its internal organs are absolutely free from disease. If this examination shows any diseased condition at all, the calf is not permitted to this point are wanted because they have to start in all over again with another calf.

What the doctors have got from the calf is the germ virus. From every bit of bacteria has to be removed. It is carefully ground with a mixture of glycerine and carboxylic acid through a very fine bronze virus gauge. All germs are thereupon killed. What is left is a creamy substance which is kept on ice until ready to be used on human beings, but first it is thoroughly tested on animals. So you see how careful doctors are in preparing this health-preserving substance. Now let us consider for a moment the claims of busybodies who oppose vaccination and allege that it is harmful. One of the claims that these people make is that arms and all sorts of terrible things are being made by farmers in all sections of the country.

Largest number of orders has come from Saskatchewan and Alberta, Mr. MacMillan said, due probably to the abundance of low grade feed available for their stock. The object of the scheme is to increase the exportable surplus of bacon and pork products through assisting farmers to improve the quality and type of the breeding stock. The farmer receives a specially selected animal of suitable type at cost, plus one-half the cost of freight from the stockyard to his farm.

In commenting on the scheme, Mr. MacMillan said one of its features was the interest being taken by farmers who were turning to hog-raising for the first time as a supplement to their ordinary farming operations.

Advances Special Training

Properly Trained Pigs Mean National Success Says Ontario Premier

"We are on the verge of, if not actually entered upon, one of the most competitive ages in the history of the world," declared Premier George S. Henry recently. "And the nations which will succeed are those with trained populations with people trained to produce the best, in the most economical method possible."

The premier of Ontario was giving his fullest encouragement to educationists, who, gathered from many parts of Canada, met at a dinner in Toronto, and opened discussions on the formation of a Canadian educational guidance movement.

The directing of the youth of the nation from the school into the lines of endeavor each scholar, boy or girl, is best fitted for, it is the aim that animated discussion.

"If we strike out this new line of endeavor, which may seem suddenly expected, we will reap the end of a world reputation that will stand to our credit," Premier Henry said. "With a properly trained population, with the elimination of misfits, we can be equal to, if not superior, to anybody."

Premier Henry, following addresses by President Sherwood Fox of Western University, London, Ont., and Principal Charles Bishop of Alberta College, Belleville, said he believed there would be a national call for such an organization as was proposed.

He expressed some doubts whether young people were not sometimes being encouraged to follow higher education when some of them were obviously much better directed into some livelihood they were more fitted for. The best way, he said, was to let them finish up by being "misfits" in other lines of endeavor.

Manual labor was still a good thing, the premier said. He echoed the sentiments of Dr. Sherwood Fox who, in referring to the lowering of some of the barriers to Canadian endeavor in other lands—notably the restrictions upon emigration to the United States—pleaded for proper placing of Canadian youths in Canadian endeavors.

"We can find employment for our young people," Premier Henry promised. He rather believed in putting the blame, when it came to Canadian youth seeking an outlet in other lands, admitted. Perhaps not sufficient thought had been given to the question of placing youth after education had been completed.

Pure-Bred Sows

Orders For More Than 500 Sows For Breeding Stock Have Been Received

More than 500 orders for pure-bred sows for breeding purposes have been received by the Dominion Department of Agriculture since Hon. Robert Weir, the minister, announced the new policy in November. A. A. MacMillan, chief of the sheep and swine division of the department, said the scheme now is operating throughout the Dominion and, besides the order received, many enquiries are being made by farmers in all sections of the country.

Largest number of orders has come from Saskatchewan and Alberta, Mr. MacMillan said, due probably to the abundance of low grade feed available for their stock. The object of the scheme is to increase the exportable surplus of bacon and pork products through assisting farmers to improve the quality and type of the breeding stock. The farmer receives a specially selected animal of suitable type at cost, plus one-half the cost of freight from the stockyard to his farm.

In commenting on the scheme, Mr. MacMillan said one of its features was the interest being taken by farmers who were turning to hog-raising for the first time as a supplement to their ordinary farming operations.

Travelled Long Distance

We like a story that was very popular with the army in France.

It is the tale of a negro who was beaten for the back areas as he could go, when he was stopped by a white officer.

"Don't delay me, sah," said the negro. "I got to be on my way."

"Boy," replied the officer, "do you know who am I'm a general."

"Go on, white man, you ain't no general."

"I certainly am," insisted the officer, angrily.

"Lordy," exclaimed the negro, taking a second look. "You sure is! I must be travelling some, 'cause I didn't think I'd got back that far yet!"

The new brake that can stop a seventy-miles-an-hour car in twenty feet is almost as good as a telephone pole.

The Unattainable

Mystery Of Life's Origin And Purpose Remains A Riddle

From the time when people lived in caves, there have always been certain men who choose to cut loose from all divine writings and revelations and seek for themselves, the secret of the origin and purpose of life.

Their searchings have added a good deal to the sum total of human knowledge, to be sure. But the plain, matter-of-fact explanation they seek has always eluded them.

Now comes Professor C. Lovatt Evans, one of England's foremost scientists, to announce that the mystery of life's origin and purpose will never be solved by any scientist. Always, he says, there will remain an ultimate riddle that no laboratory worker can answer.

Perhaps this is because people, after all, aren't really matter-of-fact or uncomplicated at all.

Study your fellow-man in the mass, day by day, and you may see nothing extraordinary about him. He is, at times, quite mean and blind and selfish and ignorant and cowardly. You are almost persuaded that there is no trace of divinity in him—that he is, after all, only an untrained clod.

Then, if you get the proper perspective, you begin to see things. You see, besides the ignoble qualities, strange capacities for sacrifice, endurance, courage, fidelity, hope.

You see a mother in the slums starving herself to provide a little more food for the child.

You see an underpaid factory drudge, working his life away so that people who depend on him may live.

You see a man with a vision giving up riches and honor in order to make the world a better place for men and women who are not yet born.

You see men fighting poverty, sickness and hunger in order to procure some glimpse of truth.

You see men weaving songs and musing beauty in a net of words while cities go down in flames about them.

And, now and then, you hear battle trumpets and see flags waving, and thousands upon thousands of men step up, without hesitation, to die at someone else's bidding in the vague hope that somehow the world will be made a bit better thereby.

Will you keep on looking, then, for a matter of fact explanation? You will not—not if you are wise. You will recognize, instead, a great mystery, made radiant by distant flames.

—Vancouver Sun.

Profits In Milk

Lethbridge Experimental Farm Gives Some Interesting Figures

There should be special interest for prairie farmers in the figures with respect to milk production supplied by the annual report of the Dominion Experimental Station, at Lethbridge, Alberta. The nine cows in the herd produced an average of 11,441.6 pounds of milk and a butterfat average of 396.76 pounds. With butterfat at 43.34 cents per pound this represents a value of \$164.02. Added to this is the value of skim-milk at 25 cents per cwt., at \$27.61 for a total production value per cow of \$191.63. The total cost of feeding was \$102.52, leaving a profit of \$89.11 per head.

Not To His Taste

The lengthy recital had drawn to a close, ice cream and cake had been served, and the teacher was bidding the students goodbye. One of the little performers had brought her small brother with her. As he was about to leave, the teacher, beamingly asked: "Well, Bobby, did you enjoy the recital?"

"Yes," answered Bobby, "all but the music."

Will Remain At Post

Colonel Hanford Macmister, United States minister to Canada, has dismissed Washington reports to the effect that he might shortly leave his post at Ottawa and embark on political activities in the Republican party.

The Suicide Club—Nagels Lustige Welt, Berlin.

Extension Of Market For Honey In Baking Industry Investigated By National Research Council

Extension of the market for honey in the baking industry would seem to lie in the direction of increasing its use in sweet goods such as sugar cookies, rather than in the manufacture of bread, as has been a common belief, states the report of an investigation in the laboratories of the University of Manitoba, issued by the National Research Council's Associate committee on grain research.

It has been widely held that the substitution of honey for cane sugar in the manufacture of bread would result in a more rapid rate of fermentation and in an improvement in the flavor and keeping-quality of the bread. The study now reported which was made with financial assistance from the National Research Council and the Canadian Wheat Pool by Professor W. F. Geddes and C. A. Winkler, 1930 Wheat Pool research fellow for Manitoba, disproves this suggestion.

The alternative put forward by the investigators is that honey be used where its flavor, higher sweetening power and ability to absorb moisture are particularly advantageous.

It was found that the substitution of honey for commercial cane sugar in various straight-dough bread making formulae made no significant difference in loaf volume, flavor or other bread characteristics, indicating that honey possesses in these circumstances no superiority, but is of equal value when compared on the basis of equivalent sugar content.

Figured On Yearly Basis

Worker's Income Depends On Number Of Working Days

"This city is practically bankrupt." This is a sentence in a letter received from Detroit. It probably means only that Detroit is suffering keenly from the business depression, and that people there are despondent.

It is a little singular that with Mr. Ford paying \$7 a day to his employees—or so the world understands—and so setting a fine example to all employers, that there should not be good times in Detroit. Perhaps Mr. Ford only pays this wage to his men when they are working, and it may be that they don't work steadily.

Seven dollars a day don't mean much to a man if he only gets work occasionally. That would mean \$2-135 a year of 305 working days. But if a man's yearly income only averages \$1,200 a year that would be only \$4 a day.

The problem for wage earners is to get a living wage by the year. It would seem that a bricklayer earning \$10 a day would really only be in receipt of \$5 a day if he only worked six months of the year. Workmen here to live whether their jobs hold out or not. All their calculations should be on a yearly basis.

In Times Like These

"What the country needs is men of action, in politics as well as in business," declared Hon. Alfred Durnan, K.C., Minister of Marine, in an address before the Canadian Club at Toronto. "They alone can put a stop to the trade depression which this country and all other countries have suffered in the last couple of years."

New Road Composition

A new composition for highways recently discovered at Cape Town, South Africa, is said to cut the cost of road making one-half as compared with ordinary material, double the life of the road and halve the length of time of laying.

Do you speak French?
"Yes, but I don't like it, as I have no chance to use it."—Sondage, 1930-1931, Stockholm.

Live Stock Improvement

Dr. Huddick, Dominion Dairy Commissioner, Says Matter Needs Attention

Periodical testing of herds and direct efforts at improvement of stock are the most important questions before the dairy farmers of Canada, said Dr. J. A. Huddick, Dominion Dairy Commissioner, who addressed the annual convention of the Dairy-men's Association of Eastern Ontario.

Farmers were feeling the pinch of low prices, but he said, the average farmer is losing very nearly if not quite as much every year by his failure to give attention to this matter as he is through the drop in values at the present time.

"The average annual yield of milk per cow in Canada is now thought to be about 4,500 pounds, or the equivalent of just about 400 pounds of cheese. If this yield were increased by 30 per cent, which is easily possible, it would be equal to an increase of two and one-half cents a pound on the original 400 pounds of cheese at 16 cents a pound after allowing for the cost of manufacture," Dr. Huddick said.

From reports already received, the commissioner estimated butter production in 1930 was probably 10,000,000 pounds higher than in 1929.

IT'S SWAGGER

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Every woman knows she can't have too many frocks of sports character in her daytime wardrobe.

Today's mode is especially suitable for the college miss and the business woman.

It is in rich dark green tweed mixture with white silk pique trim. The cross-over jacket collar is accented by a brown button. The Cosmick cuffs are jaunty.

The seaming at the front of the dress, conceals hip breadths. The skirt favors slight flared fullness.

There are any number of lovely woolen fabrics that will make up charmingly in this model, as wool jersey, crepe marocain and crepe, plain and patterned wools.

Canton crepe and crepe silk in travel prints are also smart. This pattern may be obtained in sizes 16 to 20 and 36 to 42. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and clearly your name and full address, the number of the pattern and the size you want.

Saskatchewan Seed Fair

First Prize For Marquis Wheat Awarded To O. Harrison Of Conquest

Charles O. Harrison of Conquest was awarded first prize for Marquis wheat at the Saskatchewan provincial seed fair held at Saskatoon. Mr. Harrison's sample was outstanding and won easily.

George Canfield, of Wild Rose, near Shellbrook, who was champion in 1921 and 1922, won first place in the open class for other varieties of wheat. He exhibited a sample of Redward wheat weighing 98 pounds to the bushel.

In classes of wheat limited to grain from fields entered in standing grain competitions James Carnegie, of Bellock won first prize.

In the corresponding classes for new exhibitors, A. Robbins, Laura, was first in Marquis, and G. Mooney, Imperial, in the class for other varieties. All of the prizes in the class for varieties other than Marquis go to exhibitors of Redward wheat.

There is an unusually strong entry in corn in both the sections for the north half and that for the south half of Saskatchewan. In the southern section, P. G. Colquhoun, Maple Creek, was leader in dent corn and F. R. Cheeseman, Forget, in flint corn.

For the northern half, H. S. Williams, MacRorie, is first in dent, and W. A. Oshon, MacRorie, in flint.

Sheaves of grasses and other forage crops judged by T. M. Stevenson, of the field husbandry department, James and Harry Whitehead, of Saskatchewan, figure prominently in the list of winners.

James Whitehead has first place in timothy and Bromo grass, and Henry Whitehead first in alfalfa, red clover and sweet clover. Jack Darnbrough, Laura, led in western ryegrass; E. Green, Laura, in crested wheat grass, and F. P. Trowell, Saltcoats, in alsike clover. The class for sheaves of fodder corn was a large number of entries but various members of the Colquhoun family of Maple Creek take all the four prizes.

Northern Resources

Coal, Oil, Gas and Minerals Found In Peace River Block

Rich new resources of coal, oil, gas, and minerals in addition to the vast agriculture and timber lands, have been added to the future wealth of the Peace River block, it has become apparent since the inception of a survey of the area undertaken by the British Columbia government in association with the two transcontinental railway systems. While detailed reports of the surveys under the direction of Major C. R. Crydalle have not yet been presented, indications pointing to important discoveries in the recently ceded territory to the province from federal control have been brought to the attention of the provincial authorities it has been learned.

WAS IDOL OF FRANCE

Interesting character study of Marshal Joseph Joffre, hero of the Marne and commander-in-chief of French armies 1915-17, who died in Paris following an illness that necessitated amputation of one leg. The marshal, bearer of British Order of Merit, and Grand Order of Legion of Honor, would have been 80 years old January 4.

DESIGNS POST

Alexis I. Rykoff, chairman of the council of peoples' commissars of the Soviet Union, who has been relieved from his position at his own request. Rykoff, who is to be succeeded by Vyacheslav M. Molotov, has had several conflicts with Josef Stalin, chairman of the central executive committee of the Soviet Union, and the removal of Rykoff will bring more harmony to Soviet Union.

Trade With China

Demand For Canadian Flour and Wheat In Chinese Market

Inquiries for Canadian products have been received by L. M. McGroove, Canadian trade commissioner at Shanghai, as a result of the recent visit of the Canadian trade delegation to China. Mr. McGroove finds the visit helped to create an atmosphere of goodwill.

Normal trading will likely be resumed during the spring of 1931.

Fair transactions have recently taken place in Canadian flour and Canadian wheat. Lumber exports to China have shown an increase and, due to direct steamship service from British Columbia, Canadian lumber now occupies a prominent place in the Chinese market.

Demand Equitable Rates

Will Insist On Proper Ocean Rates and Marine Insurance For Churchill Cargoes

Frank Eliaison, secretary of the United Farmers of Canada, Saskatchewan section, announces the determination of the executive officers of his organization to support strongly the demand of the Saskatchewan government for the application of proper ocean rates and fair and equitable marine insurance rates on cargoes of grain and other export traffic from Churchill, on the Hudson Bay route, to British and continental ports.

Would Not Need It

A newspaper dated July 26, 1900, just found in Glasgow, Scotland, contains the following item: "Three clergymen after dinner, ate 14 quarts of soup, and during their sitting drank six bottles of port wine, and no other liquor."

Life Story Of J. B. Tyrrell, Eminent Canadian Geologist, Makes Interesting Reading

Canada's Bacon Trade With Britain Small

Dominion Could Supply Market Now Served By Denmark

Canada supplied only 89,169 hundred weight of bacon to the market in Great Britain of the 7,414,020 hundred weight imported in the first 10 months of 1930, according to trade returns. The value of the imports of bacon were \$34,922,063, of which the value of Canadian bacon was \$433,355.

Importation of Canadian hams by Great Britain is quoted as 70,968 hundred weight of the total imports of 865,035 for the 10 months.

Commenting on the amount of Canadian bacon and hams placed in the British market, W. Waldron, provincial markets commissioner, said recently: "The marketing of Danish bacon in England is carried on to a great extent by the Danish Bacon Company, Smithfield, London, England. Bacon is received by the organization from 49 factories in Denmark. The company has depots at London, Hull, Leith, Liverpool, Manchester, Chester, Barrow, Newcastle, Stoke-on-Trent, Birmingham, Cardiff, Ipswich, Exeter, Portsmouth and Bristol. Denmark has concentrated on the British market, which could be very well served by Canada, as she is well established in England and her bacon is popular."

Mr. Waldron continued to say that the sales of the Danish Bacon Company in England reached \$35,000,000 each year and that all the Danish bacon imported by England was not handled by the bacon company.

Loss From Insect Pests

Damage To Saskatchewan Crops During 1929 Amounted To Over Ten Million Dollars

The year 1929 is referred to as one comparatively free from spectacular outbreaks of insect pests. But, the annual report of the Dominion Department of Agriculture cites as a conservative estimate of the damage by the major insect pests to the wheat crop in Saskatchewan alone \$10,012,000.

A saving of \$28,000 in one district in Alberta through a local control campaign in connection with the sugar beet crop, and another case of a saving of \$5,900 on one farm alone as the result of control work with the wheat stem sawfly, show rather conclusively the value of the work being carried out under the direction of the Entomological Branch of the Dominion Department of Agriculture.

Financial Expert Gives Cause Of Depression

Men Unable To Control Machine They Have Created

"Human beings have not learned how to control the machine they have created," declared Sir Basil Blackett, noted British financial expert, when questioned as to the cause of the present world-wide depression on his arrival at Montreal. Sir Basil is a director of the Bank of England, and chairman of the Imperial and International Communications, Limited.

Financial member of the executive council to the Viceroy of India, Sir Basil is well qualified to speak on that country, which, he said, was ready for a greater measure of responsible government. He expressed pleasure in the appointment of Viscount Willingdore, governor-general of Canada, as the next Viceroy.

Powdered Milk

Saskatchewan Government Will Encourage Manufacture Of Product

The Saskatchewan government is fostering plans to encourage the manufacture of powdered milk, as used extensively in the British Isles, by those poultry raisers who provide the British market with milk-fed chickens. The possibilities of such an industry are emphasized by W. Waldron, provincial markets commissioner, who is back from the World's Poultry Congress in London, England, and who points out that part of the manufactured product could be used for prairie-raised birds.

Bee-Keeping Profitable In Alberta

Bees have proven to be a very profitable and practical division of agriculture in Alberta and today represent one of the province's youngest and fastest-growing industries, in the opinion of H. L. Luther, head beekeeper at the Lethbridge Dominion Experimental Station.

Scientists, particularly Canadian scientists, are a very modest lot, and it is often hard to get at the facts of life to extract the real gold of romance which often underlies their careers.

For this reason a biography of that eminent Canadian geologist, J. B. Tyrrell, written by his life-long friend, W. J. Louden, F.R.S., will be welcomed in that it tells a remarkably interesting story with praise-worthy clearness and throws much light on this type of explorer-geologist who has made such a big contribution to the development of Canada.

Mr. Louden tells of the geologist as a boy in Weston, Ontario, wandering after school hours about the woods collecting specimens of rocks and ferns; developing a taste for the use of the revolver and rifle; going to Upper Canada College, where his scientific bent received recognition, and thence to Toronto University, where he annexed the highest honours in geology, chemistry and allied subjects.

Then we see Tyrrell coming to Ottawa to take a position with the Geological Survey and his explorations for many years in the far West and the far North. That was the early 'eighties, when Calgary and Edmonton were little villages, when buffalo still roamed the plains and thrills aplenty were the lot of the explorer. Journey after journey was taken in the West. He explored the hills of the Rockies, through Saskatchewan and Manitoba, and to the outposts north of latitude fifty.

Particularly important were Tyrrell's surveys in the Red River basin. Coal mining in this area was then a dream of the future, and its subsequent development owes much to the splendid reports turned in by this great geologist. He was the first man on the continent to discover the remains of dinosaurs, the gigantic animals which millions of years ago wandered in the foothills of Alberta. At great personal risk he and his surveying party brought the first specimens of these animals to the National Museum.

Tyrrell was sent to the Yukon just before the great gold rush of '98. The lure of gold got into the blood. He resigned his job with the Geological Survey and with a mining interest in mind he went to the Yukon. He nearly starved for a time, then prosperity came as his way. Contracts for expert opinion poured in, claims were taken up, companies formed and for some years his income ran to \$30,000 a year.

But the day of placer mining was passing; he failed to get the financial support for his biggest property, he was involved in costly litigation, and by 1905 he decided to bid farewell to the Land of the Midnight Sun. In this part of the story we see Dawson as it really was, a town of wild license, of mad gambling, of hard days when gold was washed in abundance from the river bed followed by wild nights when it flowed into gambling halls, into the clutches of painted women or was squandered on the turn of a card.

Tyrrell came back from the Yukon untainted by the excesses of many who had been lured by the spell of the Klondike, but not much richer in pocket. Later he accepted a very remunerative position as chief geologist for a great Anglo-French mining corporation and continued his explorations and investigations in every part of the Dominion, but particularly in Northern Ontario. A few years before the Great War he made the most important survey of the Hudson Bay district ever undertaken at the request of Sir James Whitney. Still hale and vigorous at 72 he is today recognized as one of the greatest mining and geological experts on the continent—Ottawa Journal.

The man who tells you he is no fool may be only mistaken.

"Why did you steal this gentleman's watch?"

"Because I thought it was a gold one."—Lustige Kölner Zeitung, Cologne.

"Pointers on Bread Making"

A booklet containing some new and simplified ideas on bread making. Sent free on request.

PURITY FLOUR

WORLD HAPPENINGS BRIEFLY TOLD

An increase of \$5,592,819 (about \$7,117,472) in Britain's adverse trade balance for 1930, as compared with 1929, was revealed in board of trade statistics.

The United States senate immigration committee has referred the Reed resolution providing a two-year ban on immigration to a sub-committee for consideration of changes.

Exclusion of Orientals from ownership or control of Crown lands in B.C., is sought in a petition to the provincial government by the White Canada Association of Vancouver.

Inquiries for Canadian products have been received by L. M. Cosgrove, Canadian trade commissioner to Shanghai, resulting from the Canadian trade delegation's visit.

There should be no fear regarding disposal of the 1930 B.C. canned salmon pack, in the opinion of Major J. A. Motherwell, chief supervisor of fisheries.

Three men were killed and one injured when a Royal Air Force bombing plane crashed into a dyke bank at this village on the border of Nottinghamshire and Lincolnshire, England.

The division of the waters of the St. Mary and Milk Rivers in Alberta for irrigation purposes will again be considered by the International Joint Commission at its regular half-yearly session in Ottawa during April.

Money in circulation in the United States increased \$28,000,000 during 1930. The circulation statement of the treasury showed that on December 31, \$4,890,000,000 was going the rounds.

A contribution of \$50,000 for expenses of participation by the United States in the world's grain exhibition and conference at Buenos Aires, in 1932, was recommended by Secretary of State, Henry L. Stimson, in a report which was forwarded to congress by President Hoover.

A representative of the government will be present at the opening on March 14 of the British Empire Trade Fair at Buenos Aires, but no announcement has yet been made as to the minister whom Premier R. B. Bennett will send to the Argentine capital.

A Word To The Farmer

Must Produce Quality and Control Volume Of Products

In a message to eastern farmers recently issued, the Hon. R. Weir, Federal Minister, points out that to compete in world markets the farmers of Canada must: (1) continue to make progress along the lines of even more scientific farming; (2) reduce the cost of producing farm products; and (3) having a definite purpose in marketing, (a) see that no product inferior in quality goes to a foreign market, (b) produce in sufficient volume to hold a market once obtained, and (c) regulate supply to such markets so as to prevent flooding.

A Nifty Headlight

Some day the captain may turn to the first mate and ask: "What that headlight?" Sounds funny, but John Kohls, marine expert, declares that a new type of headlight with a modified radio beam, combining light and sound, will soon make navigating in fog safe.

Two states have post office names Snowflake; Virginia and Arizona.

Impressed With North Country

American Writer is Surprised At Mining Development In Northern Manitoba

Those coming to The Prairies, Flon and Sherridon to see frontier towns where life is in the raw, and "anything goes" would do well to stay away from these centres. W. L. Henderson, a writer from Chicago, Ill., visiting in the north, declared in an interview. Mr. Henderson, a free lance newspaper man, and fiction writer, has been searching for local color for a series of stories he is going to write on northern Manitoba's north country.

"The progress this country must have made in the past five years is startling," he declared. "Flon and Sherridon are astounding communities to find far in the bush country north of the 54th parallel."

"I considered I was fairly well informed on Canada's north country, but I have been astounded by the signs of industrial progress, lawful behaviour of citizens, and the great future that is apparent for these towns and cities," he remarked.

"Flon will rank with any mine on the continent as a modern metallurgical plant and Sherridon will prove to be a rich producer," he predicted.

GRACEFULLY FALLING SKIRT

All Tingey models are created and sketched in Paris and the patterns are made in New York.

This model is especially nice for the woman of average full figure. The front in wrapped arrangement is decidedly slimming.

And into the bargain, it's such a simple easy dress to wear. It absolutely doesn't need any trimming. The softly falling tunic design of the skirt is charmingly graceful.

The original model in dark green crepe patterned woolen is very serviceable. It can be carried out in almost any of the new smart fabrics as canton crepe, maroon crepe, satin crepe, velvet and rayon novelties.

This pattern may be obtained in sizes 16 to 20 and 36 to 42. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Moose Jaw Grain Elevator

Dominion Government Grain Elevator Has Huge Storage Capacity

"Although the normal capacity of the Dominion Government grain elevator at Moose Jaw (exclusive of the new 2,000,000 bushel addition) is generally placed at 3,500,000 bushels," says "The Optimizer," "this amount of grain has been exceeded on several occasions during the past few weeks. On October 30th last, a total of 3,584,792 bushels of various grains were in store, while on November 13th there were 3,570,504 bushels and on November 22nd, there were 3,553,604 bushels stored up."

Former Secretary of State Frank Kellogg, returning from Oslo, Norway. In Oslo he was awarded the Nobel peace prize for 1929 for the famous Kellogg treaty whereby war, as a means of arbitration, was outlawed by leading powers of the world.

All-Canada Phone System

Big Telephone Project To Link Halifax With Vancouver

As a result of the co-operative arrangements between the seven main telephone systems of Canada, the work is now proceeding to realize an all-Canada transcontinental system that will make it possible for a firm in Halifax to speak with one in Vancouver, a distance of 4,319 miles, without using lines outside of the Dominion.

At the present time a long distance call from Montreal to Vancouver would require a connection first with Chicago then with Seattle and from there to Vancouver.

Up to the present time it has been impossible to link western Canada with eastern Canada over an all-Canadian route. This has been partly due to differences in standard equipment of the various companies, but chiefly to the fact that what is known as "long" long distance service requires somewhat different equipment than the "short haul" traffic, such as large size copper wire, etc.

With a view to inaugurating the all-Canada service, large size copper wires have already been installed between Toronto and Winnipeg, while the three government systems of Manitoba, Saskatchewan and Alberta are now at work constructing such heavy duty lines preparatory to the introduction of the all-Canada service. British Columbia and Maritime organizations are also undertaking the work, so that in the near future the construction of the line from coast to coast is expected to be complete.

At the rate the work is at present proceeding, it is anticipated that by the summer of 1931 long distance messages may be transmitted from Halifax to Calgary, and by the spring of 1932, it is expected the entire coast to coast service will be in operation.

Marine Merger

World-Wide United States Shipping Service To Be Created

A world-wide shipping service under the United States flag will be created through a consolidation of interests of the International Mercantile Marine Company and the Roosevelt Steamship Company, which was announced in New York.

The merger, which has been rumored for several months, was announced by P. A. S. Franklin, president of the International Mercantile Marine. The Roosevelt company, which was organized in 1925, will retain its corporate identity.

West Indies and Canada

Canada must assume a temporary role of "big brother" to the British West Indies if the full possibilities of trade between these parts of the Empire are to be attained, says a report issued by the Empire Club of Ottawa following a study of the subject. In other words, the report holds, Canadians must spend a greater sum in the West Indies in order that the island citizens may be placed in a position where they can become heavy purchasers.

Has Done Some Walking

After walking a distance of more than four times around the world at the Equator during the last 35 years, Fred A. Dullahan, Central Vermont railway messenger, at St. Albans, is beginning his 36th year of hiking. He has averaged 10 miles per day, 300 days per year for 35 years, giving him a total walking mileage of 105,000.

Three pennies of Edward the Elder, 901-925 were sold in London recently for \$755.

SUNDAY SCHOOL LESSON

JANUARY 25

JESUS TEMPTED

Golden Text: "In that He, Himself, hath suffered being tempted, He is able to succor them that are tempted."—Hebrews 2:18.

Lesson: Luke 3:21 to 4:38.

Devotional Reading: Romans 8:31-39.

Explanations and Comments

The Nature of Christ's Temptations, verses 1, 2.—Yielding to the control of the Holy Spirit, which had come to Him in a special way at His baptism, Jesus went from the Jordan into the neighboring wilderness, that He might there meditate undisturbed upon the work God had given Him to do. As the story is told in Mark, Jesus seems to have sought His great struggle throughout His wilderness sojourn, but as it is told in Matthew and Luke, the specific temptations seem to have come at the end of the period.

The Temptation To Free Himself From the Burden of His Humanity, verses 3, 4.—During a long period Jesus had eaten nothing, and the role of the devil was to tempt Him to eat. "If Thou art the Son of God, command this stone that it be bread." The word "if" may be taken in the sense of "since": Since you have the power (Jesus had just been assured of this at His baptism), why not make use of it for yourself? The question which Jesus had to settle was, should He seek personal relief use power which was given Him for the sake of the kingdom, or should He trust His Father and accept whatever sufferings His Father might send? His answer was, "Thou shalt trust."

The Temptation To Establish an Earthly Rather Than a Spiritual Kingdom, verses 5-8.—The Jews were expected a Messiah who would free them from Rome, and establish an earthly kingdom greater than that of their father David. What might Jesus not accomplish if He yielded to the role of a temporal Messiah? For such a Messiah they would sacrifice their lives freely and gladly. The devil showed Him all the kingdoms of the world in a moment of time. Jesus might have all this authority and glory of them—if He would pay the price. Would it not be a quicker and easier road to travel than the road to Calvary? To seek temporal instead of eternal good, to build up a material instead of a spiritual kingdom, would be to betray Himself to the devil, to worship before him.

The Temptation To Presume Upon His Father's Love.—Throughout His ministry Jesus was asked for a "sign" of His divine Sonship, but here at the beginning of His work He set that question once and for all: conspicuous as He was of His oneness with His Father. He would not make trial of Him to prove this to the world. "To leap unhurt from the pinnacle of the temple was to rival mountain goat or a chamois, but it had no connection at all with spiritual power and was no sign of disposition and ability to save men from their sins. To abandon the region of men's actual need and work wonders, not for their relief but for mere display, was to trespass against the Father's love and to mistake the Father's intention."—Marcus Dods.

The Tempter Vanquished, verse 13.—When the devil had completed every temptation, he departed from Him for a season. "The moment that the obedience of the life was established, the mental turmoil settled into peace within him."—Phillips Brooks.

"A SINGLE SIP PROVES IT"

Exponent Of Perpetual Motion

Inventor At Pacific Coast Thinks Invention Will Revolutionize Industry

The Vancouver Sun publishes the following despatch from Prince George, B.C.:

"Prince George has now an exponent of perpetual motion in the person of Nicola Schmidt, a local engineer, who claims to have invented an engine operating by a mixture of water and air, which requires the expenditure of no oil whatever. Mr. Schmidt claims that his engine will occupy about one-third as much space and weighs about one-half as much as the most efficient power plant, and that once it is installed there will be no further expense whatever. Mr. Schmidt is highly secretive as to the principle upon which his engine operates, but his business manager, H. A. Hurtubise, announces that the engine will revolutionize industry.

Saskatchewan Resources

National Resources Office For Northern Saskatchewan Located At Hudson Bay Junction

One of the three natural resources offices in Northern Saskatchewan has been located in Hudson Bay Junction. E. J. Marshall, who has been in charge of the Porcupine reserve for some years, has moved to the Junction, and has been promoted to district superintendent. His district extends from the Manitoba boundary to range 12, and from township 35 on the south to the Churchill River. All matters relating to the forests, lands, mines and fisheries in this part of the province are to be administered from the local office.

A toy automobile, whose six-cylinder engine has real moving parts, has appeared in Paris.

Sweet apple cider is found to have about the same food value as apples.

WINDOLITE

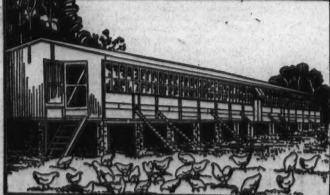

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: JOHN A. CHANTLER & CO., LTD.
51 Wellington St. W. TORONTO, ONT.

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN. SUNROOMS ETC.

ACID after meals

GET RID of your dread of pain after eating. Eat without fear of "indigestion," sour stomach, disagreeable gas or headaches.

When your food ferments, "dis-agrees," lies like a lump in your stomach, it's a sign of too much acid. You need not resort to crude methods—take instead an anti-acid that will correct the condition: Phillips' Milk of Magnesia.

A spoonful of this pleasant-tasting, soothing fluid neutralizes many times its volume in acid. It restores the proper alkaline balance to an acid-

soaked stomach and bowels—assists these organs to function as they should.

Phillips' Milk of Magnesia is what you need when a bad breath, coated tongue, headaches, nausea or biliousness indicates an over-acid condition. Take a spoonful today and for several days and see how it sweetens the system. You won't be nearly so liable to colds or sickness. All druggists in the Dominion sell it in 50c bottles.

Genuine Milk of Magnesia is always a liquid—never a tablet. Look for the name Phillips on the bottle.

CHAPTER IX.—Continued.

"Always, Nick, or I wouldn't have gone with you, of course, I remember just how I felt. I watched you start, and the tears were so near that to stop them I stooped down and began fussing with those jingals. And then—you came! Oh, I was almost afraid you'd see I had the strangest emotions. I was happy and frightened all in a breath—terribly happy because you'd come, even to say good-bye; and frightened because I feared my heart was in my eyes. I was almost relieved when at last you turned away, though if you hadn't looked back—if you hadn't come back, Nick, I think I should have died."

"Why, my dear, precious little Gay?" Nick's voice was husky. "I never guessed. Aren't aren't weren't the very limit? Think of your springing that on me after four whole years! And I was too much of a dunc to even know that you were the one girl in the world—for me. Well, you'll have to admit that it didn't take me long to find it out!"

She looked up at him almost shyly. "Nick—do you still feel that way about me?"

He laughed, and kissed her. "I wouldn't change a hair of your head, my dear."

"Really, Nick?"

Her voice sounded so sober that he said: "Why should you ask? Haven't I been a model husband? Come, Gay, let's not get serious. Let's get over my trouble we ever had, and be kids again. If we start now we can have a half hour at The Bird's Nest, and get back in time to kiss the boys good-night."

It was two weeks after this, one Friday evening when Gay and Simeon were sitting together on the porch, that they were interrupted by a call at the telephone.

"It's a long distance for Mrs. Hast-

When BABIES are Upset

BABY ill and ailments seen twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea. How would you meet this emergency—tonight? Have you a bottle of Castoria ready?

For the protection of your own eyes—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergencies; let it be an everyday aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria.

Fletcher's CASTORIA

ings," announced the housekeeper, who had answered the ring.

Instantly Gay's heart pounded. Suppose something had happened to Nick! But it was Nick's own voice that reassured her a moment later.

"That you, Gay? How's everything?"

"All right. You frightened me, Nick. What's happened?"

His laugh came back over the wire, sounding so dearly familiar that he seemed very near.

"Nothing—that is—Gay, would you think it terrible if I didn't come up this week?"

"Why?"

Her voice was hollow. Perhaps Nick noticed for he said: "Don't sound so mournful! Of course I want to come; but Mrs. Hastings has asked a favor, and I hate to refuse. Her husband's been called away by the death of his mother, and she's expecting friends for Sunday. She's planned to take them to Mason's Falls. They've got a new car, you know, and for some reason she doesn't want to drive it; so she asked me to go."

"I see," said Gay.

There followed the least little silence. Then Nick said: "What do you think, dear? I don't exactly like to refuse. I was there to dinner tonight, and she's waiting now to hear your verdict."

"You know best, Nick. Well, miss you, of course; but if you feel you must—"

"Well, I sort of do feel that way; and next week you'll be coming home. Look here you understand, Gay, don't you?"

Anxiety was in his voice, and she replied: "Yes, I understand. Good-night, Nick. Our time must be more than up."

"Hold on a minute! You're really right, aren't you? Not sick or anything?"

"Of course."

"And the boys?"

"Oh, they're splendid; but they'll be disappointed not to see their dad."

"Falls, can't you let 'em be disappointed too. Gee! It's good to hear your voice! I'm getting a little tired of subsisting on letters and week-end visits. Good-night, dear."

"Good-night," said Gay quietly, and hung up.

But she didn't move for a minute. She sat there by the telephone, her heart pounding too rapidly. "Why on earth should I mind so much?" she asked herself. "It's ridiculous—childish. It's not right to get dependent on one human being for all your happiness, even if he's your husband. If I let that feeling grow on me I'll be a jailer. Of course Nick couldn't refuse to go with Mrs. Hastings. This is the third time he's dined there, and we'll go home on Wednesday anyway. I ought to be ashamed to mind at all!"

She drew a deep breath and went back to the piazza. It was dark, and Simeon couldn't see her face.

"What's up?" he questioned.

"Nothing, except that Nick can't come tomorrow."

She tried to speak cheerfully, but her mood was not lost on the old man.

"Ain't sick, is he?" he questioned.

"No; but our new neighbor has asked a favor he couldn't very well refuse. She has some visitors, and she's going to take them to Mason's Falls on Sunday."

"Can't that cynical husband of hers drive a car?"

"She usually drives herself, but she wants a chauffeur for this special trip. Her husband's mother has just died and he's away."

"M-m—" growled Simeon. "So while he attends the funeral, she goes gallivanting with her fine friends? Son-of-a-gun, Gay, I don't know ways take to that neighbor of yours."

A breath of relief escaped Gay's lips.

"It does me good to hear you say so, Uncle Sim. I don't take to her,

other; yet I can't lay a finger on anything really wrong with her, except her silly talk about children spoiling her career. I don't see that she has much of a career anyway, though she does sing divinely, and paints, too. Nick says I'm unjust to her. Perhaps I am. I'll admit that to see her ordering a man to weed those flower beds she makes such a fuss about, sometimes enrages me. She looks so neat. Nick spoke of it one day, and I just know he was wishing I looked the same, though he didn't say so."

"Good land, dearie, I wouldn't call you so 'slovenly Peter'."

"Well," Gay answered, with a rueful laugh, "I feel like one when I look at Mrs. Hastings! It's hard to keep up with everything when you have two babies as young as mine. I know some of my clothes are behind the times; but they're not worth sending to a dressmaker, and I'm too tired to sew myself. But—but I hate to have my husband think me—historic!"

"Shucks!" said the old man gently. "He don't think no such thing."

"He wouldn't have thought so if it hadn't been for Mrs. Hastings," said Gay. "She's not a product of Balfourville, and she's different from the few summer people who come to us. I just can't understand the Hastingses choosing such a place. They suppose it's never will, I am sure. I don't think they'll just upset us a bit and go away—when she tires of her garden."

"The sooner, the better," growled Simeon below his breath; then added cheerfully: "Now, dearie, don't you go to gettin' worried about yer looks. I bet if you was to ask Nick outright he'd say you'd got Mrs. Hastings beat to a frazzle."

He rocked quietly for a while. Save for the frogs down by the mill pond, the night was quiet, and, suddenly, a whistle—will raised its voice.

"First I've heard this year," said Simeon quietly; then: "Dearie, if I was to make you a little present—say a hundred dollars I got clutcherin' my desk, couldn't you buy some of them almy nothings like Mrs. Hastings, without the bother of goin' to a dressmaker? Seems like I seen catalogues of most everything under heaven, from this new-fangled undergarment they call undies, to party dresses that ain't got no backs. Not that I'm advisin' you to dress that way; but you can't be young only once, Gay, and I wouldn't want to think you was goin' without things you hanker for—not while I don't know what to do with my spare cash."

For a minute Gay did not speak, then she arose impulsively, and seating herself upon the old man's knee, kissed his cheek.

"Whistle Simeon—your're the most understanding person in the world. My first thought, after gratitude to you, was that I mustn't take a gift like that from anybody; but I've changed my mind because I know it will make you happy to give happiness to me. I don't say I'll spend it all on clothes, but I'll freshen up a bit, and get some things the children need."

(To Be Continued.)

History Lecturer: "Can, any of you tell me what makes the Tower of Pisa lean?"

Curpulent Lady: "I don't know, or I'd take some myself."

Italy expects a downward revision of agricultural, sugar scales.

Weak After Operation

"I was very weak after an operation. My nerves were so bad I would sit down and cry and my husband would not go out and leave me alone. Now my nerves are much better. I thank a booklet that was left under the door. Lydia E. Pinkham's Vegetable Compound surely put me on my feet. I have taken eight bottles. My friends tell me I look fine. My sister has taken this medicine too."—Mrs. Annie Walton, 67 Stanley St., Kingston, Ontario.

Linking Up "Canada's Main Street"

By William Child, Executive Secretary, Eastern Manitoba Development Bureau and General Secretary Manitoba-Ontario Trans-Canada Highway Association.

Great hopes will be realized when Manitoba and Ontario are officially linked up with the National Highway in the fall of this year. Much energy and hard work has been gone through by the Manitoba League, Municipalities, Service Clubs, Good Roads Organizations and prominent men of both Western Ontario and Eastern Manitoba, since the year 1919, when first their people went on road as demonstrators of highway action between the head of the Great Lakes and the City of Winnipeg.

The day of the official opening of the highway between Kenora and Winnipeg has not yet been set, but it may safely be said that it will be in the early part of next September, probably Labor Day, in order to give the motor tourist and owner a chance to come down to the Ontario border and take in the celebrations.

The Eastern Manitoba Development Bureau, sponsors of the movement for an official ceremony and picnic, have also called upon the Manitoba Motor League through its live wire Secretary A. C. Emmett, to assist in laying out plans for the monster event. W. J. Graves, vice-president of the Manitoba Motor League, has also thrown in his lot with the movement.

Mr. S. H. T. Robert, representing the St. Boniface Kiwanis, and St. Boniface Board of Trade, willingly allowed their names to go on the roster as members of the Public Relations Committee.

Mr. W. J. Graves, president, Manitoba Motor League, and A. C. Emmett, with the secretary, are authorized to proceed to Western Ontario points to interview the heads of different organizations who it is anticipated will be extending their efforts in this epoch making event to be celebrated next fall.

Assurances have been received from both the Ontario and Manitoba Governments that the road will be open for this event and that they will give their hearty co-operation to the movement.

Perian Balm is the one true family aid for good health and beauty. Aids the mother in additional loveliness. Protects the tender skin of the child. Delights the father as a hair fixative or cooling shaving lotion. No matter to what use it is put, it is always a winner in the game. Every woman should use it. Perian Balm cools and caresses the skin and eases the complexion of surprising loveliness.

Hiking Around World

Jugo-Slavian Youth Started From Washington Last September

Arriving at Halifax in the course of a projected journey around the world, mostly by foot, that began at Washington in September, Joseph Sekulick, slim young Jugo-Slavian, left to get a ship for Newfoundland, whence he plans to sail for England. At an average rate of 30 miles a day, Sekulick had hiked 2611 miles when he reached Halifax. He hopes to complete the globe-circling tour at Washington in something less than four years. The total mileage of his planned trip is \$3,100. With a command of eight languages, Sekulick anticipates less difficulty in new lands and other countries than would otherwise be the case.

Its Main Use

At a meeting of a rural district council a deputation of farmers asked to be received. They wished to complain about the state of a main road just outside the village. They found, however, that their arguments were not received very favourably. At last the chairman managed to get a word in.

"Look here," he said, "the road is fairly good as a whole."

"Yes," replied the spokesman of the party, "but we want to use it as a road."

Packed Into Small Space

Until 1892, the largest telephone cable contained only 50 pairs of wires; whereas a cable has now been perfected which contains 5,886 wires, packed within a diameter of only two and five-eighths inches.

W. N. U. 1878.

Sight-Sound Dramatic Production Broadcast

Actors In Studio At Chicago Make Television History

Slide-stopping minister looking equipment, a small audience squeezed in between humming machinery in the control room of station WGBX and watched from behind the scenes what is believed to have been the world premier broadcast of a synchronous sight-sound dramatic production.

Irene Wicker, Vinton Haworth and Douglas Hope, made television history in their appearance in "The Maker of Dreams."

The play went on the air to be received by those with a television and radio combination set, the effect being a close, relative to a small white, but not without many flaws as yet. But the experts said "Give acceptance time."

Everything possible was done to outlast noise because the creak of shoe-leather would have given the impression of artillery in action; the men played in stockinged feet. The girls wore soft sandals.

A Simple Treatment For Children's Colds

Cold in the head is very common at this time of year, especially in the very young. Neglect of a cold is prone to lead to serious consequences. To relieve all congestion of the system is the first step in treating a cold, whether in infants or adults.

Baby's Own Tablets are the ideal means of doing this. Containing no narcotic or other harmful drugs they soothe the child's fretfulness, relieve its suffering and ensure convalescence.

Baby's Own Tablets are without an equal for relieving indigestion, constipation and colic. They check diarrhoea; break up colds and simple fevers; promote health-giving sleep and make the dreaded teething period easy. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Thought Converted Into Electric Energy

Invention Of German Professor Something Entirely New

A machine which is said to register thought by curves has been invented by Professor Hans Berger, of the University of Jena, Germany. The invention converts thought into electric energy, which is registered on a chart. The "thought chart" looks like a weather or earthquake chart. Deep thinking shows violent up and downs, shallow thinking merely a zigzag line. So far, nobody has been able to read the thoughts themselves, and further research will be made to discover whether an interpretation of the curve is possible.

British picture shows are visited by something like 30,000,000 people every week.

The pleasure mad are probably mad because they find no pleasure.

LOSE YOUR FAT

This sensible way

Start taking Kruschen Salts—that's the common sense way to reduce—but don't take them with the idea that they possess reducing qualities in themselves.

This is what they do—they clean out the impurities in your blood by keeping the bowels, kidneys and liver in splendid working shape and fill you with a vigor and liveliest energy you'd almost forgotten had existed—you get the needed exercise.

As a result instead of piling yourself in an easy chair every free moment and letting flabby fat accumulate you feel an urge for activity that keeps you moving around doing the things you've always wanted to do and need to do to keep you in good condition.

Kruschen Salts are the up-to-date Fountain of Youth. Take one teaspoon in a glass of hot water to-morrow morning and every morning thereafter. You'll find you can take regular moderate exercise—then watch the pounds slide off.

Little Helps For This Week

"Thou wilt show me the path of life; in Thy presence is fulness of joy."—Psalm xvi. 11.

I need Thy presence every passing hour; What but Thy grace can foil the tempter's power; Who like Thyself my guide and stay can be; Through cloud and sunshine, oh, abide with me.

You remember the old story of how Michael Angelo was ever on his forehead, fastened in his artist's cap, a lighted candle, which always shone brightly on his work, and kept his shadow from falling on it. If I could always have thus the light of Christ's life, presence ever falling onward on my path, keeping the shadow of my self behind and out of sight, oh, what an easy climb it would be then!—In the Mist.

Relief Of "Lustania"

A bottle covered with mussels and seaweed, containing a paper on which was written in English, "Lustania torpedoed; will sink within ten minutes," was washed up on the shore of Langesand Island, off North Frisland, and it was learned here recently. Those who examined the bottle are convinced of its genuineness. It has been forwarded to the Cunard Line office in London, England.

Always Ready and Reliable—Practically all pains arising from inflammation can be removed with Dr. Thomas' Colicache Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is so great that it inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all skin diseases, scratches, bruises and sprains. Keep a bottle handy always.

Valuable Manuscript

A valuable Syriac manuscript in the University of Chicago weighs 50 pounds and its parchment pages are expected to reveal new light on Christianity in the Dark Ages, for it deals with "A Collection of Selected Discourses On All the Feasts Composed by Orthodox Holy Fathers."

Local and General

Mrs. J. B. McNichol was a visitor in Calgary on Tuesday.

Mrs. H. Young is visiting her daughter at Lethbridge this week.

"Teddy" Urquhart of Elmore, spent several days last week visiting his brother Wm. Urquhart.

Carl Becker of Black Diamond has been renewing acquaintances in town during the past week.

Mrs. J. Robertson was a visitor in Calgary on Tuesday.

Mrs. A. E. Tatham of Edmonton spent last week in town the guest of Dr. and Mrs. Whillans.

Mrs. L. Overby who underwent an operation at General Hospital last week is making satisfactory progress towards recovery.

A Big Dance is to be held in the U. F. A. Hall on Friday, Jan. 23. Music by the Moonlight Serenaders of Calgary.

The annual meeting of the ratepayers of the Village of Crossfield will be held on Monday, Feb. 2.

Mr. Hugh Allen, M. L. A. for Grande Prairie and Mrs. Allen spent the week-end with Mr. and Mrs. R. M. McCool.

Mr. and Mrs. R. M. McCool, Mr. and Mrs. H. Allen motored to Calgary on Tuesday to attend the U. F. A. Convention.

Mrs. Hepworth and daughter left town on Tuesday last to visit relatives and friends in the Bowden district prior to leaving for her home in Idaho.

Evangelist and Mrs. Moreash will return for one more service at the U. F. A. Hall on Sunday, January 25th. at 8.15 p.m. Subject—"WHAT IS THE SOUL?"

The Bridge Club met at the home of Mrs. Reeves on Tuesday evening. First prize was won by Mrs. J. Belshaw and second prize by Mrs. D. McAdams.

The Ladies Aid tea and sale of home cooking, announced for Sat., Jan. 31st will take place at Mr. Halliday's store, 5 to 6 p.m. Donations of cooking will be greatly received.

On Saturday night Kathleen Mair entertained about twenty-five of the young people of the district to a skating party on the Murdock lake, afterward serving a lunch at her home.

H. D. Halliday & Co. have purchased the grocery business of the Studer store at Didsbury. Harold Halliday and Sid Willis should prove a strong combination in giving the people of Didsbury service plus, as these gentlemen know their groceries.

George Murdock, president of the Old Timers' Association, is a busy man these days, with making arrangements for the Old Timers' Round-Up, selling membership tickets for the Board of Trade and tickets for the Burns' Night concert and dance, George is a busy man.

The friends of Mr. Robt. Colling of Chilliwack, B. C., late of Crossfield, will be sorry to hear of the death of Mrs. Colling, which took place on Wednesday of last week Jan. 14th.

Angus Robertson was in town on Monday and was passing around the cigars and receiving congratulations on the birth of his son, who was understood to be named James Stuart Archibald McDonald Robertson.

Chalk, foolscap, ink and all requirements for schools at the Chronicle office.

Fellowship Club Notes

On Thursday, Jan. 15, the Crossfield Fellowship Club met in the Masonic Hall. This meeting was "Intellectual Night" and the committee in charge had two very interesting illustrated lectures and a short talk by Mr. McCool ready for the members. The first lecture was entitled "Across Canada by the C. P. R." and the colored slides as they were thrown on the screen made us all proud of Canada. After this lecture was completed Mr. McCool gave a very interesting talk on how things are done in the Legislative Assembly in Edmonton. Then came the other illustrated lecture "Women, the World Over." This lecture gave a series of pictures of women of various nationalities in their native dress. On the whole everyone spent a very enjoyable evening even if the seats did get a little hard.

We would like to take this opportunity to remind the public in general that this club is for young people, whether married or single. The president or any other member of the executive will be glad to furnish details to anyone who is desirous of joining the Club.

Oneil News

A very pleasant time was had at the Oneil school on Friday evening, when 15 tables of court whist were in play. Prizes were won by Mrs. J. Oneil, ladies' first; Mrs. Chas. Fox, ladies' second; A. Sackett, gent's first; H. McCool, gent's second; Mrs. W. Landymore and J. Collins carried off the booby prize.

At mid-night a very dainty lunch was served, dancing followed, and as an added attraction Shorty Jones and Ken Oneil delighted those present with their tap dancing. Ken also brought down the house with a recitation of his own composition.

Mrs. Chas. Smart as convener for the evening deserves credit for the able manner in which she had everything arranged.

Twenty-two Years Ago

From the Chronicle of Feb. 19, 1908

The warm sympathy of the whole community is extended to the Urquhart family of Crossfield who have within a short time suffered the double bereavement of father and mother. On Saturday the 7th day of December the remains of the late Alexander Urquhart were interred, and on the same day of the week ten weeks later Mrs. Urquhart joined her husband in the great beyond.

M. L. Boyle, secretary of L. I. district 14-A-5, wishes to inform the people of his district that he has a number of applications for seed grain, which anyone may have who intends applying for grain.

S. Timmins has returned to town after spending a few days out east.

Geo. Becker has just received a carload of Studebaker wagons. A tame bear was brought into town on Monday and is in the keeping of J. Brand.

On Friday an enjoyable time was spent at the home of Mr. and Mrs. H. C. Morrow in honor of Mr. Morrow's brother E. L. Morrow of Kenmore, N. Dak.

Sunshine News

The Sunshine Junior U. F. A. held a dance on January 9th. at the school. Thirty couples tripped the light fantastic to the lovely strains of music provided by the Carstairs orchestra to wee sma hours in the morning.

Mr. J. R. Laut is the delegate from the Sunshine Local to the annual U. F. A. Convention to be held in Calgary this week.

Mrs. George Lim left of Saturday to visit relatives at Victoria. Mr. and Mrs. Wm. McCrimmon wish to thank all those who helped them in any way during and after their recent fire.

Letters to The Editor

Editor
The Chronicle.

Sir:
On Thursday last, having occasion to go to the city, I decided to see Mr. Anderson of the Calgary Power Co. Ltd., regarding my light bill, which I had considered rather high. I had written a letter of complaint to the company, so did not look for a welcome sign on the door as I went in.

However, Mr. Anderson gave me the most courteous treatment: in fact he treated me as one might a long lost brother. He gave me all the information possible; and, whilst my bill seemed high to me, it was below the average for the province, which is 42 kilowatt hours per month.

The meter itself is a most accurate and dependable instrument, declared Mr. Anderson, who has been through the business from A to Z, and he said that only a lightning shock or earthquake could put it out. Any defect in your service due in 9.44 per cent. cases to a fault or leak in the wiring.

In the past year Crossfield has consumed enough power to warrant a reduction of 10c per month or \$1.20 per annum in the service charge, which will now be \$1.40. I was given such fair treatment that I left Mr. Anderson's office with a smile, instead of with a frown as I had expected.

P. C. GRIFFITHS

Editor Crossfield Chronicle.

Sir:
Congratulations are due you upon your success in getting such a good attendance of ratepayers at the "Annual Meeting of the Crossfield School Board."

Some were disappointed at not hearing the Inspector's reports of the lower rooms read.

Trusting you may continue this good work until every child has received his and her heritage.

Without the co-operation of parents, school boards and teachers the best results need not be expected.

Yours for the school children
A RATEPAYER

The Church of Ascension

The annual meeting of the congregation was held on January 18th at 3.30 p. m. The Rev. A. D. Currie in the chair. The minutes of the last annual meeting were read and approved.

Mr. Currie then read his report of baptisms, weddings and funerals for 1930. He also expressed his disappointment at there being no country people present and that no officials of the Guild were there to read their report.

Mr. Tredaway then read the financial report which showed:
Total receipts \$1169.53
Disbursements 1076.06
Balance forward 93.47
\$1169.53

The improvement to the property was mentioned also in the report.

The following were elected or appointed the wardens and vestry for 1931:

Rector's Warden, T. G. Sefton.
People's Warden, F. T. H. Tredaway.

Lay delegate to the Synod, F. T. H. Tredaway.

Vestry: Messrs Ivor Lewis, H. Fitzpatrick, R. Fox, W. Major, C. Mayman, Constable Jarman, F. Mossop, and F. Stevens.

Votes of thanks were passed to the following for their services in 1930: Grace Williams for playing the organ at Sunday School; Mrs. Thomas for playing at services. The Guild for their wonderful help, always very cheerfully given. The Wardens for their very efficient services in the past years.

Mr. Currie also thanked the congregation for their co-operation since he arrived in the parish.

Farewell

Evangelist and Mrs. Moreash will return for one more service at the U. F. A. Hall on

Sunday, January 25th. at 8.15 p.m.
